Testimonies

"It was an eye opener to what investment is all about and I came away with a very healthy respect for what it takes to be an investor/trader. The combination of technical analysis and fundamental analysis also showed the huge difference of the different ways one trades. It was a very intensive course but very relevant. It has perked my interest to really apply what I have learnt - and get some real experience under my belt." - *Rita*.

"This course was what I was looking for. I had the opportunity to understand stock investing from both a technical and fundamental perspective. These are life long important skills that I'm sure will pay dividends in my investments. The trainers were very knowledgeable and good at explaining concepts. I only wish we had more time with the course!" - *Brian Lam*.

Trainer profile:

Mr Pius Wong has more than 20 years of trading experience in both financial institutions and foreign enterprises, including 7 years in currencies, swaps and the money markets and 5 years in trading the equities, bonds and emerging debt markets. He has trained traders and treasury traders and conducted seminars in banking operations. Currently, he is a licensed trading representative for both futures & securities markets. Pius holds a Bachelor in Business Administration from Royal Melbourne Institution of Technology, a Diploma in Management Studies from Singapore Institute of Management and a Diploma in Investment from The Institute of Banking and Finance.

Mr Lee KW has more than 25 years of investment experience in the US, Singapore and Malaysia stock markets. In the past 15 years, he has been managing a portfolio of stocks for his family's investment firm. Mr Lee's investment approach focuses on value investing, i.e. buying highly profitable and financially strong companies with great business where the shares are at bargain price. He believes in a portfolio approach to investing by constructing a properly diversified group of stocks and maintaining an appropriate asset allocation ratio. Mr Lee holds a Bachelor of Science (Hons), a Master of Science in Ecology and a Master of Business Administration (Financial & Investment) from University of Hull, UK.
